

Appendix 2

Disciplines and categories

A quick glance at just some of the specific topics studied and researched by our alumni demonstrates the enormous breadth and variety of individual subject areas involved. In order to manage this information in a practical way, the CSC allocates a broad academic discipline to each application nominated for one of its awards. The purpose is partly to help identify suitable expert academic advisers during the selection process, and partly to enable us to keep a record of the fields of study in which our award holders are involved.

For the purposes of this evaluation study, we have broken down the 83 disciplines we most commonly use into nine categories, chosen with the objectives and priorities of the CSC and its funding bodies in mind. We recognise that, while in some cases disciplines fall naturally under a specific category heading, others do not and have therefore been allocated to what we feel is the most relevant category. We also recognise that in some there may be some crossover or duplication, and bear these factors in mind during the evaluation process.

Academic awards: home institutions

Commonwealth Academic Staff Scholars, Academic Fellows, and Split-site Scholars are usually nominated by their home institution and are, for the most part, employed by them both before and after their awards. Over 340 institutions are represented; the list below includes the top 25 in terms of how many staff and/or PhD students have held academic awards. Please note that further members of staff may have held 'general' (agency-nominated) awards and that data for some academic years is incomplete.

Home institution	Country/ Region	Total number of academic award alumni
University of the West Indies	Caribbean	65
University of Dhaka	Bangladesh	58
Makerere University	Uganda	42
University of Malawi	Malawi	39
University of Dar es Salaam	Tanzania	35
